

Small Business Cash Flow & Expense Tracker

Project Description

Designed and developed a professional **Microsoft Excel dashboard** to help small businesses monitor their financial performance by tracking income, expenses, cash flow, and business trends. The dashboard transforms raw transaction data into meaningful visual insights through interactive reports, enabling faster and more informed decision-making.

The project was built using industry-standard Excel features, including Pivot Tables, Pivot Charts, KPI cards, slicers, data validation, conditional formatting, and Excel Tables. It allows users to analyse monthly income trends, expense distribution, payment methods, and top vendors through an intuitive and interactive dashboard.

The workbook is structured with separate data entry sheets for income and expenses, automated calculations, backend Pivot Tables, and a clean executive dashboard that updates dynamically as new data is added.

Key Features

- Interactive executive dashboard
- Dynamic KPI cards for business performance
- Monthly Income Trend Analysis
- Expense Distribution by Category
- Income Analysis by Payment Method • Top Expense Vendor Analysis
- Interactive slicers for filtering reports
- Automated Pivot Tables and Pivot Charts
- Structured data entry using Excel Tables
- Data Validation for accurate data entry
- Conditional Formatting for better data visualization
- Professional dashboard layout with automated calculations

Tools & Excel Skills Used

- ✓ Microsoft Excel
- ✓ Excel Tables
- ✓ Pivot Tables
- ✓ Pivot Charts
- ✓ XLOOKUP
- ✓ SUMIFS
- ✓ Data Validation

- ✓ Conditional Formatting
 - ✓ Slicers
 - ✓ Dashboard Design
 - ✓ KPI Development
